

Upgrading your SMART software

Upgrading SMART (basic) software installation to the following versions:

SmartBoard Driver = v10.6.175.2

SMART Notebook = v10.6.219.2

SMART Response = v3.0.159.0

Galleries if needed

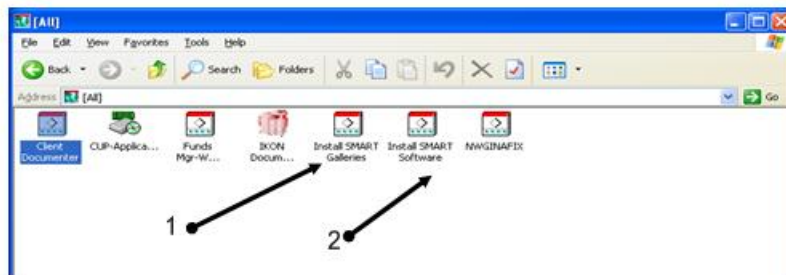

Log into the CCSD network and NOT workstation only

Do not start any other programs including GroupWise

If you have a SMART Document Camera, unplug the USB cord from the computer

Click on the "Application Explorer" folder on your desktop

Click on the icon named "All"

Once this is finished, click on **Install SMART Galleries**. (If you cannot start this install, it means you have the up-to-date galleries and do not have to run this).

Click on **Install SMART Software** next. (If you cannot start this install, it means you have the up- to-date software and do not have to run this).

Restart your computer.

The average time to complete these upgrades is 10-15 minutes depending on the time of the day and how many people are using the network. If you have any problems, call the help desk- 308-8181.
