Course TECH29202 ***20 Recert: Using eChalk to Create a Classroom Web Presence, Support Differentiated Inst..**

SRN 92920201 (use this number to register for this session)

Description * Using eChalk to Create a Classroom Web Presence, Support Differentiated Instruction & Engage Parent Communication, IS A COURSE TITLE CHANGE. THIS COURSE WAS FORMERLY KNOWN AS: eChalk for Teachers

Intended Audience: CCSD K-12 Teachers (PROVISO LEVEL 2-3)

15 contact hours / 20 SDE renewal credits

This course is designed for those K-12 teachers who already have basic knowledge of computer skills and the Internet and are ready to learn to use eChalk as a classroom communication tool. Participants will be introduced to and be given time explore the following features in eChalk:

- Setting up user profiles and email accounts
- Class pages
- Using eChalk email and discussion groups effectively in the classroom to promote reading and writing and research

Participants will also be expected to use eChalk in their classrooms. Guided activities and assignments will offer teachers new ideas for incorporating technology into the classroom to support their curriculum.

Additional Information *PLEASE NOTE:*

--You must attend the 1st night of class or you will be dropped from the course.

--If there are fewer than 10 participants enrolled one week prior to the start date, this course may be cancelled.

--In order to receive renewal credit, you must attend at least 90% of the 15 hours of this course.

Course TECH29553 **60 GRAD: Differentiating Instruction through Technology Integration**
SRN 92955301 (use this number to register for this session)
Description This course is designed for K-12 teachers who have knowledge of basic computer skills and want to use that knowledge to assist them with differentiation in their classrooms. The emphasis will be on using technology to assist in creating differentiated instruction in the classroom. The objectives, materials, and activities chosen to be used in this course are based on researched best practices.

This course relates to the College of Charleston s conceptual framework and theme of making the teaching and learning connection by instructing teachers on methods to use to differentiate instruction with the assistance of technology. The course is also designed to support the Charleston County School District s Plan for Excellence, by improving teaching and learning through the effective and efficient use of technology (CPE, Curriculum and Instruction Improvement, Technology Plan, Goal 3).

This graduate level course is for 45 contact hours / 3 graduate credits / 60 SDE renewal credits.

Additional Information *PLEASE NOTE:*
YOU MUST BRING A \$105 CHECK MADE OUT TO CCSD AND YOUR TEACHING CERTIFICATE THE FIRST NIGHT OF CLASS TO CONTINUE.

--This graduate level course is for 45 contact hours / 3 graduate credits / 60 SDE renewal credits.

--You must attend the 1st day of class or you will be dropped from the course.

Course TECH29510 **20 GRAD:Research Modules, Intriguing Questions, & Subject Samplers: Using Tech to Create..**

SRN 92951001 (use this number to register for this session)

Description Research Modules, Intriguing Questions, & Subject Samplers: Using Technology to Create Independent Reading Activities

15 contact hours / 1 Graduate Credit / 20 SDE Renewal Credits
Proviso Level: 3 and 4

The Internet offers a vast number of educationally sound web sites that students can use to discover new information. Participants in this hands-on course will create three projects that they can use in the classroom to encourage students to read independently at any grade level in any curriculum area. (1) Research Modules allow students to complete a mini research project to find information to complete a given task. (2) Intriguing Questions get students excited about discovering information online. Teachers can use Intriguing Questions to introduce a topic of study. (3) Subject Samplers provide online information on a given topic to encourage students to come to a subjective opinion about a unit of study. During class time, participants will be introduced to these projects and will spend in-class time creating the projects in order to integrate technology into instruction in their own classes.

Prerequisites: This is an advanced computer course. Since this is a course that helps teachers with the integration of technology into the classroom, it is assumed that the participants already have proficient computer skills. Therefore, computer skills will not be taught in the class.

In order to complete the projects for the course, participants must have proficient skills in using PowerPoint 2003: creating slides, adding graphics, creating animations, etc.

Additional Information *Please Note:*

YOU MUST BRING A \$35 CHECK MADE OUT TO CCSO AND YOUR TEACHING CERTIFICATE THE FIRST NIGHT OF CLASS TO CONTINUE

Course TECH29315 **20 Recert: Using the Interactive SMARTBoard to Enhance Learning - BEGINNER**
SRN 92931501 (use this number to register for this session)
Description In this course, teachers will explore multiple uses of the SMART Board interactive whiteboard. Students will participate in hands-on exercises that guide them through the features of the SMART Board to enhance instruction, comprehension and presentations. Participants will become familiar with the SMART Notebook software to create dynamic and interactive lessons and activities. Learn how to use all the tools of the SMART Notebook software to develop lessons with moving and stationary objects, including hidden answers. Use lesser-known features such as SMART Recorder and Video Player to enhance instruction. Teachers will be given hands-on time to apply new skills and will leave this course with classroom-ready activities that incorporate the SMARTBoard.

The assessment of this course will be based on demonstration of skills taught using a check off list.

Additional Information *Intended Audience: K-12 classroom teachers.*

15 contact hours / 1 graduate credit / 20 SDE renewal credits

--You must attend the 1st day of class or you will be dropped from the course.

--If there are fewer than 10 participants enrolled one week prior to the start date, this course may be cancelled.

--Please be considerate of others. If you cannot attend, please go to "My Schedule" and "Drop" the course as soon as possible.

--In order to receive renewal credit, you must attend at least 90% of this course.

Course TECH29225 **20 Recert: Introducing Google Earth into the Classroom**

SRN 92922501 (use this number to register for this session)

Description Google Earth represents, in essence, the whole world on a student's computer. It enables users to "fly" from space to street level to find geographic information and explore knowledge from a geo-spatial perspective.

Teachers can use Google Earth to get students excited about geography, and use different layers to study economics, demographics, and literature. The only limit to Google Earth's classroom uses is your imagination.

Course TECH29921 **20 GRAD: Scavenger Hunts, Photo Essays and Electronic Scrap Books: Using Tech to Create...**

SRN 92992101 (use this number to register for this session)

Description Scavenger Hunts, Photo Essays and Electronic Scrap Books: Using Technology to Create Independent Reading Activities

The Internet offers a vast number of educationally sound web sites that students can use to discover new information. Participants in this hands-on course will create three projects that they can use in the classroom to encourage students to read independently at any grade level in any curriculum area. During class time, participants will be introduced to these projects and will spend in-class time creating the projects in order to integrate technology into instruction in their own classes.

Prerequisites: This is an advanced computer course. Since this is a course that helps teachers with the integration of technology into the classroom, it is assumed that the participants already have proficient computer skills. Therefore, computer skills will not be taught in the class.

In order to complete the projects for the course, participants must have proficient skills in using PowerPoint 2003: creating slides, adding graphics, creating animations, etc.

Additional Information *PLEASE NOTE:*

YOU MUST BRING A \$35 CHECK MADE OUT TO CCSD AND YOUR TEACHING CERTIFICATE THE FIRST NIGHT OF CLASS TO CONTINUE. THERE IS AN ADDITIONAL \$5 ONLINE REGISTRATION FEE.

Intended Audience: K-12 classroom teachers.
